**Why *SOMESING* ?**

# Which App is Yours ?

## Karaoke App Market

As the development of internet network and smart devices progresses, the Karaoke application has founded the platform for the Karaoke market by providing easy access and availabilities to many countries, especially in which the Karaoke culture has not been initially present. Currently, many Karaoke application products have launched globally, and the number of users are estimated at around 500 million.

Note:

S- App (U.S.A.) : Play Store / App Store Market – 200 mm number of downloads

E – App (South KOREA) : Play Store / App Store Market 8 mm number of downloads

# Singing is Consuming the Accompaniment(MR)?

## Singing is Creative Work!

The previous Karaoke application had provided music covers to users with limitations in its free services, which demand additional fees to users for other services.

Although the users may have formed a significant number of fans from the music that they created, the only rewards the users received were the words of encouragements without any financial element in it.

This seemingly unfair profit distribution and reward system have been formed by undervalued recognition of the music composing industry in which many countries overlook the financial value of creative work.

# BIG Challenges

**SingLovers Pay For Everything**  
**SingLovers Receive Nothing**

Note:

**SingLovers** : The SOMESING users that love singing and value it as a way of expression, conveying their thoughts and individual principles through their creative works of music.

# SOMESING for SingLovers

The music has been an integral part of people's lives in every culture and society around the globe. Now, the creative work of composing music has become a tool and way to express one's value and thought. This collection of individual creativity in music leads our world to being filled with beauty and diversity.

**SOMESING** is a platform for **SingLovers**.

Anyone can enjoy the music that they like.

The enhancement or recreation / remix of new or existing music pieces are rewarded fairly.

**The fair profit distribution is enabled by the Blockchain technology.**

Everyone that enjoy the creation activities of music receives the rewards and profits for the music that they created.

This will lead the creative work and activities to its exponential growth, providing tremendous inspiration to SingLovers on peer-to-peer basis.

**SOMESING** will enable every participant to become active creators of music.

The fair rewarding and profit sharing system will motivate those creators to sustain their creativity within SOMESING's ecosystem and its work stream, resulting in the fruitful world of music.

# BIG Challenges : **SingLovers Pay For Everything**

The current system of our Karaoke application product provides music covers and depends its administrative/marketing and platform management expenses solely based on the profits gained by its SingLovers user fee.

## Business System Revolution 1

# **SingLovers Pay Nothing**

All of the SingLovers in the world will be able to have free access to more than 40K+ number of Karaoke music covers including K-Pop and other various genres at any time.

 **TJ communication** (Music cover provider to be added)

# BIG Challenges : SingLovers Receive Nothing

As contents creators, the SingLovers users have composed their own music. While their music is in popular demands, they have been unable to gain any rewards or profits out of their creative work.

## Business System Revolution 2

# SingLovers Reward Program

### SOMESING Ecosystem

The ecosystem of SOMESING is designed in a way that the SingLovers receive their fair share of profit based on our effort of designing the promotions and events (e.g. Fans' gifts, supports, and other various collaborations of communities and events)

**At SOMESING,**  
the profit sharing system will be automated and the profitability of each SingLover's will be calculated based on the SingLovers' contributions without any systematic interruption or manual modification.

# How *SOMESING*'s Works

Business Model

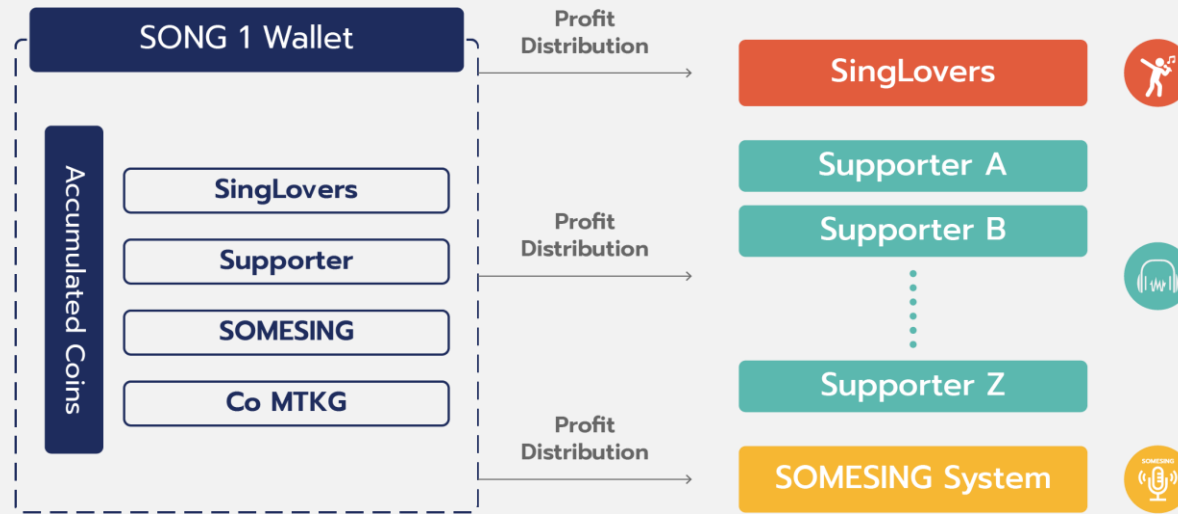

# Service Flow

# Expansion of SOMESING system

# Decentralized System

**Based on the rate of contribution during the music content creation work, the SSX (accumulated coin) in the Song Wallet is distributed without its central system's interruption.**

- A block is created based on each song composed by the SingLovers in the SOMESING's ecosystem. This block forms the Song Wallet.
- Any SingLover of the SOMESING ecosystem can participate in composing the song that is consisted of the block in many various ways.
- The logic behind the block enables the automatic distribution of profit.
- The smart contract embedded in the block automatically calculates the contribution rates and assign the compartmentalized copyrights without the central system's interruption.

# Democratic Governance : **The Rule of 5%**

- Anyone with SSX can make suggestions regarding SOMESING ecosystem operation and improvement.
- Among those suggestions, the SOMESING Committee is mandated to review the suggestions that has gained 5%+ agreement of the SingLovers and needs to provide review results and evaluations to the SingLovers.
- The suggestions made are accessible to any SingLovers for a certain period of time, and if those suggestions are implemented by the SOMESING COMMITTEE, the proposal owner is rewarded accordingly.
- By this system evaluation and review process, the system governance and oversight can progress and be sustained by its democratic structure.

# Forecast of Accumulated Subscriber Numbers

## By December 2020 200m Subscribers Globally

	19.1Q	19.2Q	19.3Q	19.4Q	20.1Q	20.2Q	20.3Q	20.4Q
Max.	3m	15m	30m	60m	150m	300m	450m	600m
Regular	1m	5m	10m	20m	50m	100m	150m	200m
Min.	0.3m	1.5m	3m	6m	15m	30m	45m	60m

Forecasted based on the number of accumulated subscribers in the top 5 global Karaoke application products

Assumptions:

- Benchmarked based on global music cover supplier in the roadmap.
- Max. is set at 3x the Regular (standard mean) number; Min. is set at 30% of the Regular number.
- Number of active users are set at 10% of overall subscribers.

# Virtuous Cycle of SOMESING's Ecosystem

Each stakeholder voluntarily enters SOMESING's ecosystem to serve themselves participating in making profits, and the ecosystem grows by those entrants and participants based on their growth of activities, which create the overall virtuous cycle in the ecosystem:

(e.g. Free services, joy of singing, profit sharing within the community, music marketing, rising value of coins, and sharing / reflecting opinions, etc.)

# What Makes *SOMESING*'s Unique?

Technology

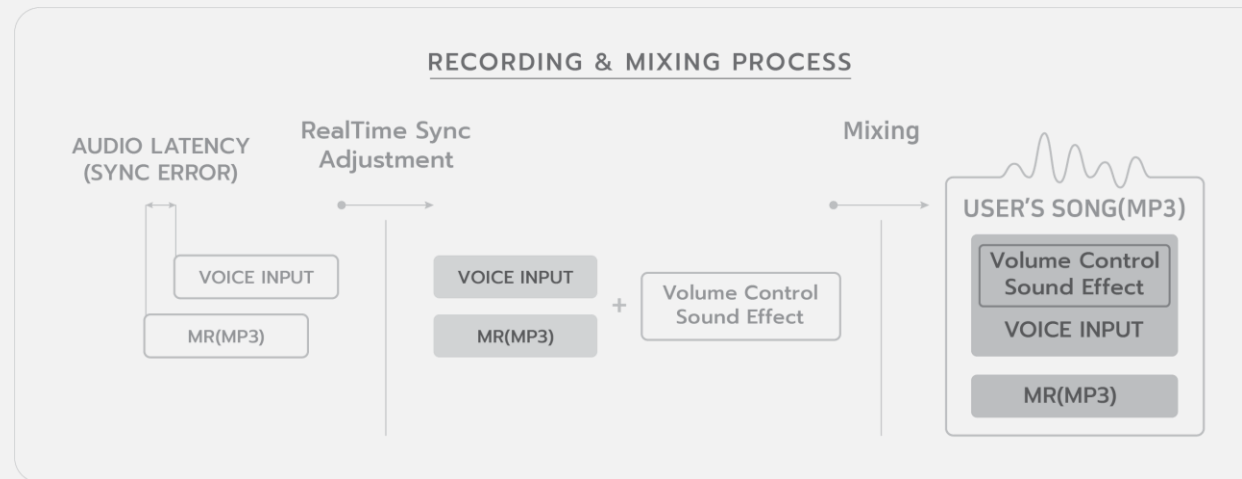

# Technology: **Sync & Sound Effect**

## **Accompaniment (MR) Key Adjustment Function**

- Adjusts a song's note base key to the user's voice

## **Sync, Volume, and Effect Control**

- Adjusts user's voice input and audio latency control in real time
- Controls volume of Accompaniment(MR) based on user's voice
- Provides effect control functions such as echo/reverb/room size

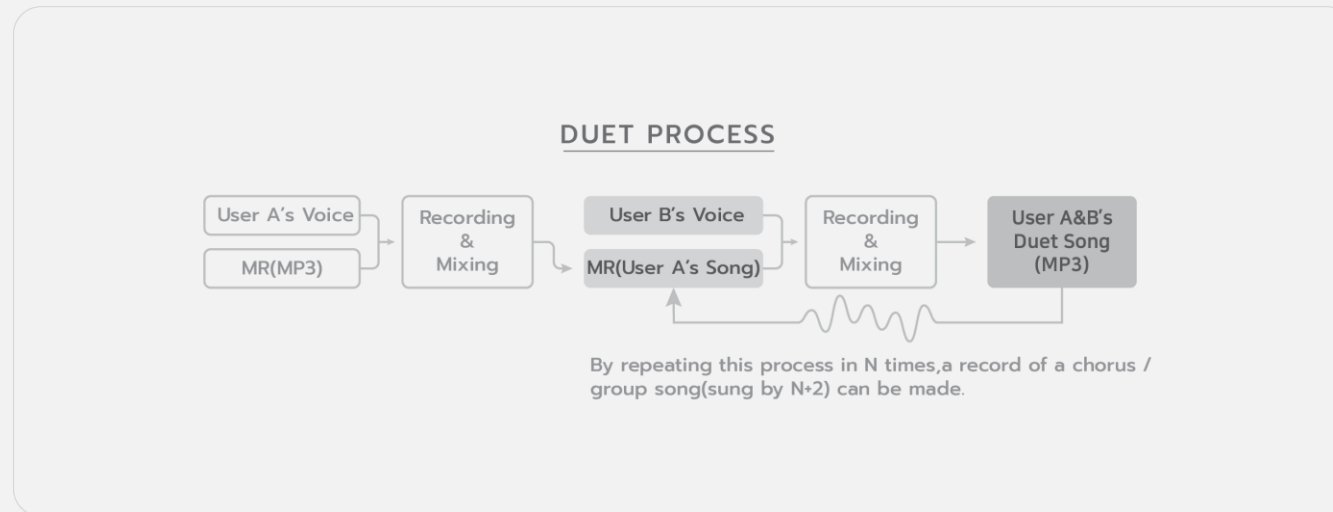

Implementation of RECORDING & MIXING PROCESS to obtain the best sound quality.  
Improved user convenience and satisfaction.

# Technologies : Duet

## User Part Editing

- Provides personal edit function for each part based on user's preference
- Provides mimic function for any edit function once the part is edited
- Provides switch function for male/female sections
- Enables various duet content creation functions in the same song
- Conserves edit resources during operations, while providing new music

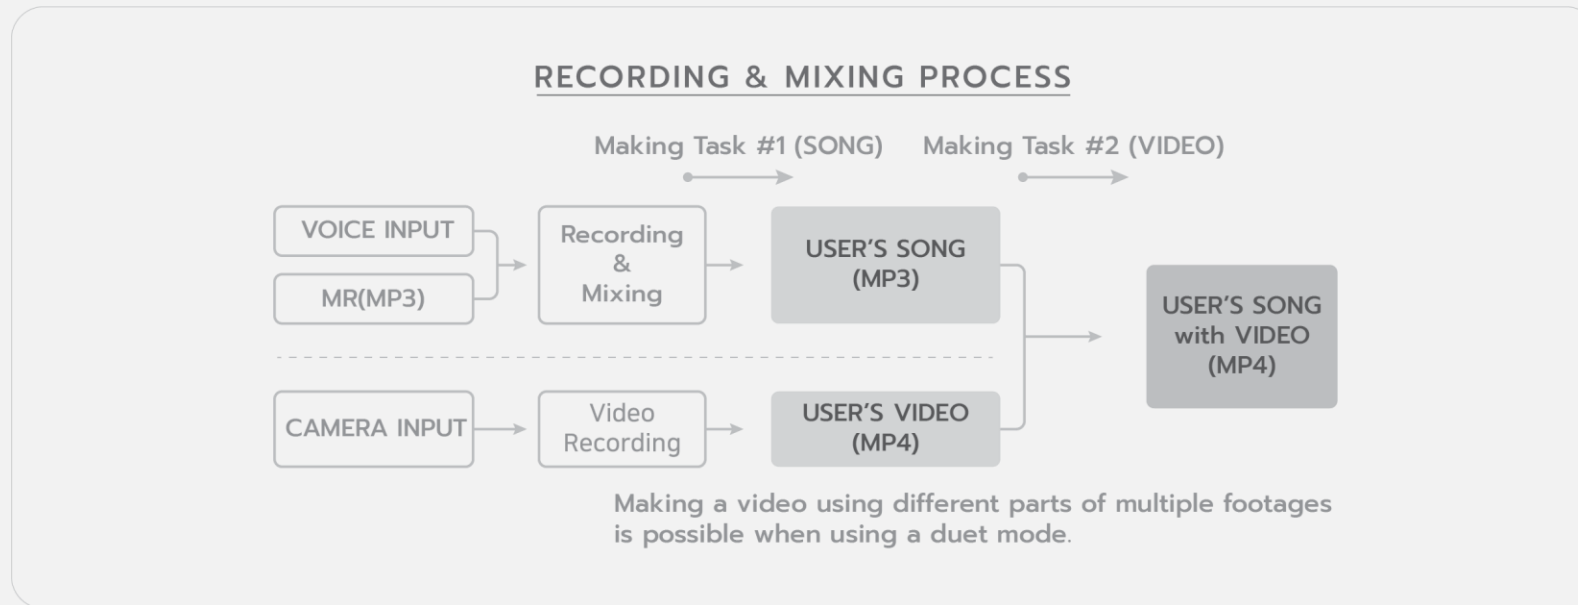

It is possible to edit user part and recursive implementation of RECORDING & MIXING PROCESS to maximize enjoyment by increasing communication with other users

# Technologies : **Video**

## Apply VIDEO through SYNC implementation of CAMERA + SONG

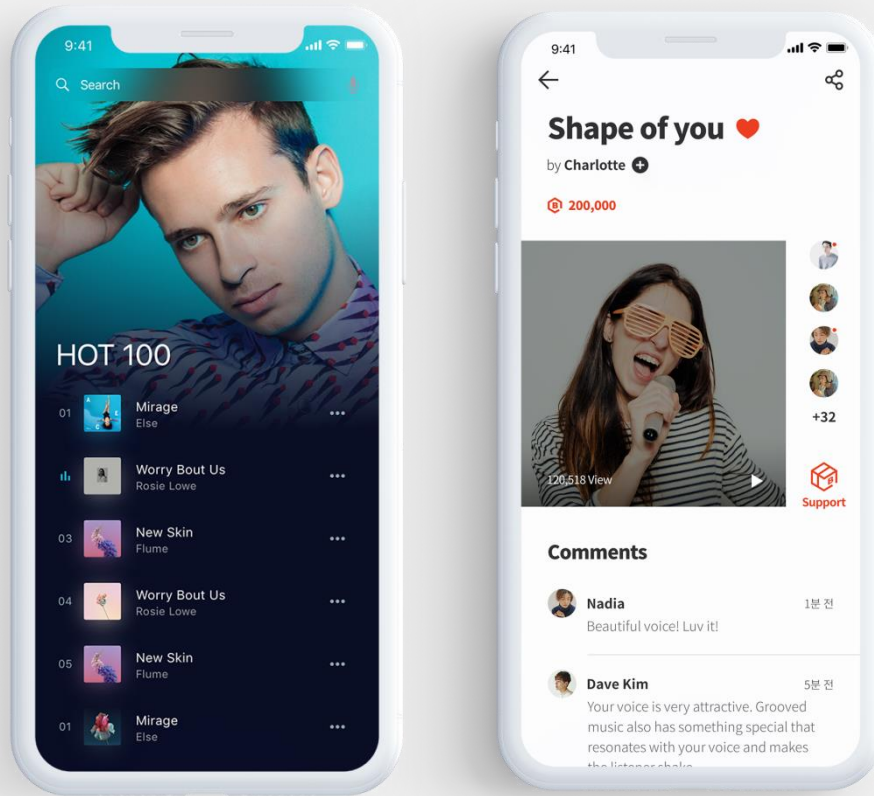

- Maximizes the MCN function that enables various channels for expression of the users

# ***SOMESING* 's Vision**

**Our Future Plan**

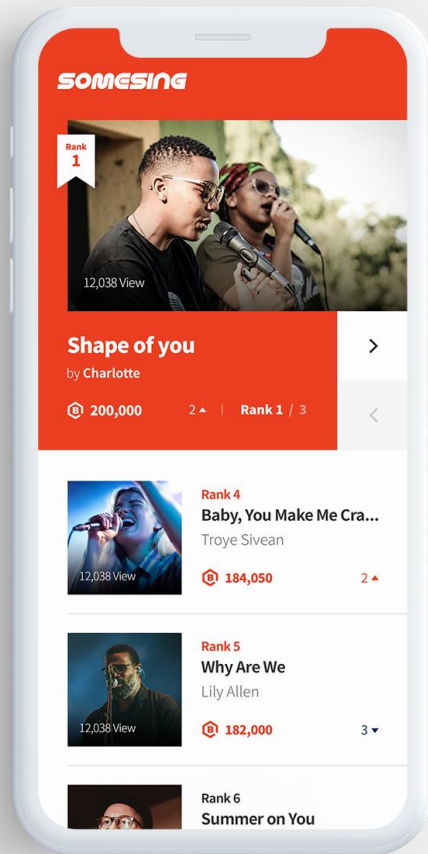

# Collaboration with Streaming Services

By syncing / collaborating with the music streaming services, SOMESING provides the switch functions between “listening to original version” and “karaoke-ing,” which conveniently switch functions for a variety of music experiences.

In addition, SSX enables to share SOMESING’s services externally, which shares and promotes sales of SOMESING’s products. This promotes consolidation of services that SingLovers utilize externally.

# Collaboration with Music Industry

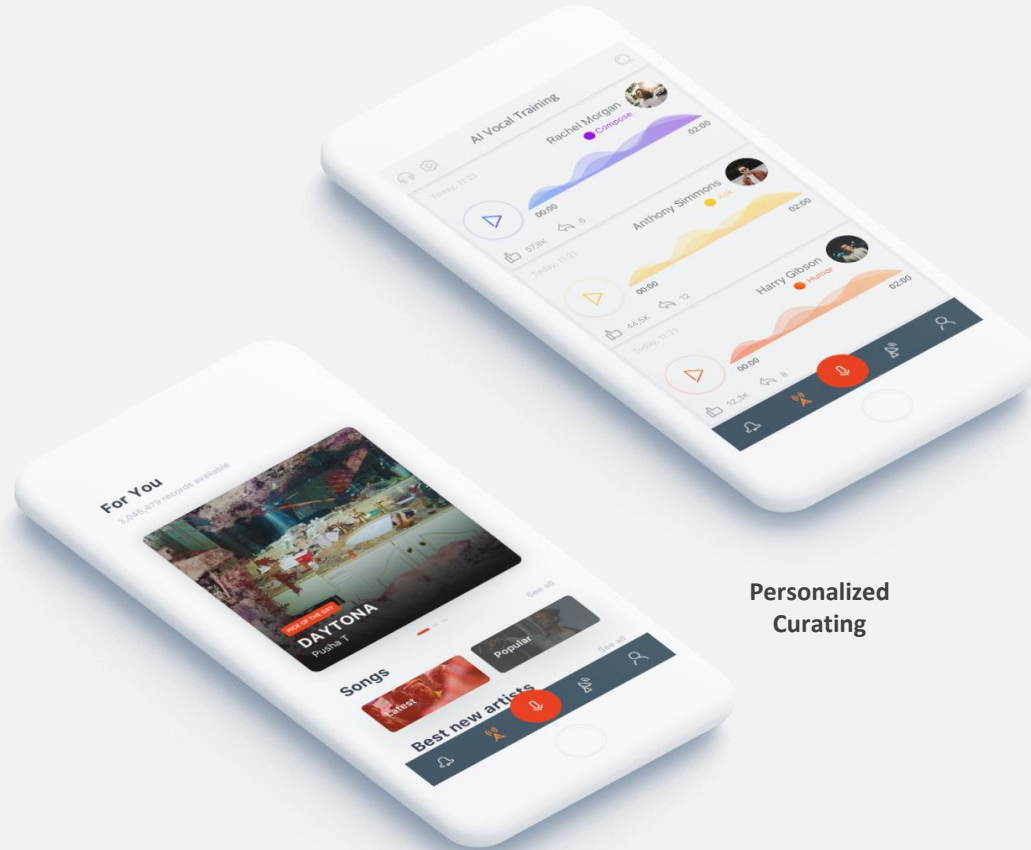

## Diversified Profit Channels and Celebrity Search/Supports

Partnering with entertainment companies for the business development, SOMESING provides SingLovers many different options and opportunities to pursue their ambitions.

SOMESING will liaise between the online and offline platforms by gauging popularity of prospective celebrities with its evaluation from the general public (both online and offline).

# Blockchain Tech + AI Tech = **Personalized Service**

Personalized  
Curating

## Big Data Analysis & Conversational AI

While the music content is saved within the block through Blockchain technology, the creator can encrypt the content or use multiple encryptions based on their preference.

e.g. Analyses on:

- Saved music list
- Listeners' music preferences and choices
- Listeners' posted replies, reviews, and opinions
- Other various form of popularity and ranking
- Coin flow
- User behavior and habits, etc.

***SOMESING* x SSX**

**The Roadmap**

# Project Launched

# Token Allocation

Every stakeholders will coexist as a community builder

Token	Description
Token Name	SOMESING Exchange
Token Symbol	SSX
Token Platform	ICON
Token Cap	To be update
Token Price	To be update
Soft Cap	To be update
Hard Cap	To be update
Payment Accepted	ICX

# Use of Proceeds

## Rational expenditure plan for early setting of services

Token	Description
Development	SOMESING system Blockchain wallet and coin
OP & Exp	Operation Legal and accounting Tax and related matters
Biz. Dev	Oversea Biz development
Marketing exp.	Public Marketing
Dex	Reserve for exchange

# SOMESING's Ecosystem Inflation

## 1. Analysis on the demand of SOMESING Coins

The demand of SOMESING Coins is mostly influenced by the volume of coin exchanges between contents creators and consumers, and the range of coin price set in the system. There is also additional demand of coins from sponsors and investors. Therefore, the total demand of coins is influenced by exchange demand (T), price (P), rapidity of circulation(V), and investment demand (S).

The equation for the total demand is:

$$M^d = Px(T/V + S)$$

$M^d$  : Demand of Coins, P : Price, T: Exchange Demand, V: Rapidity of Circulation, S: Investment Demand

## 2. Analysis on the supply of SOMESING Coins

It is necessary to clearly define the supply mechanism of SOMESING Coins in order to enhance the stability of SOMESING Coin economy. In typical economy, currency market gets stabilized when the actual currency supply equals to the currency demand influenced by production(Y) and interest rate(i).

$$M/P = M^d(Y, i)$$

In the SOMESING Coin economy where there is no effect of interest rate, the currency supply can be directly managed in consideration of production. When proper inflation occurs due to additional issuance of SOMESING coins, this issuance can work as a tool to facilitate exchanges among major actors who own SOMESING coins, and to help prevent potential deflation causing destabilization of the economy.

### 3. Issuance mechanism for the currency supply

The issuance mechanism of new currency supply aims to maintain a steady growth of both demand and supply at a proper level. In other words, Additional currency supply will be made in order to meet the future demand of SOMESING Token.

For this, the issuance mechanism is defined as followed.

The currency supply is determined by price range ( $P_t$ ), exchange demand( $T_t$ ), rapidity of circulation( $V_t$ ), and investment demand( $S_t$ ) at a certain time( $t$ ).

$$M_t^d = P_t \times (T_t / V_t + S_t)$$

Real demand, not considering currency value, is  $M_t^{rd} = T_t / V_t + S_t$ .

At each time, the currency supply should be balanced with the currency demand.

$$\begin{aligned} M_t^s &= M_t^d \\ M_t^s &= P_t \times M_t^{rd} \\ P_t &= M_t^s / M_t^{rd} \end{aligned}$$

Inflation can be measured by price changes during each period.

$$\text{Inflation rate} = (P_{t+1} - P_t) / P_t = P_{t+1} / P_t - 1$$

Thus,

$$\begin{aligned} \text{Inflation rate} &= (M_{t+1}^s / M_{t+1}^{rd}) \times (M_t^{rd} / M_t^s) - 1 \\ &= (M_{t+1}^s / M_t^s) \times (M_t^{rd} / M_{t+1}^{rd}) - 1 \end{aligned}$$

That is,

$$(M_{t+1}^s / M_t^s) = (1 + \text{Inflation rate}) \times (M_{t+1}^{rd} / M_t^{rd})$$

$$\text{Currency supply is: } M_{t+1}^s = (1 + \text{Inflation rate}) \times (M_{t+1}^{rd} / M_t^{rd}) \times M_t^s$$

Here, the real demand growth can be defined as  $M_{t+1}^{rd} / M_t^{rd}$ .

Therefore, if the target inflation is fixed to a certain rate, the currency demand ( $M_{t+1}^s$ ) for the next period can be determined by the current currency demand ( $M_t^s$ ) and the growth of real demand.

A crowd of people at a concert, seen from behind, with their hands raised in the air. The scene is dimly lit, with bright stage lights creating a bokeh effect in the background. The text "2019 Q1" and "What Changes Will Happen?" is overlaid in red.

2019 Q1  
**What Changes Will Happen?**

**Freedom of Time!  
Freedom of Location!**

**You can  
sing and Listen  
with no limits.**

Social Music Service based on BLOCKCHAIN TECHNOLOGY

**Start remixing and create music in your own music studio.  
You can create your own music video and music diary!**

Social Music Service based on BLOCKCHAIN TECHNOLOGY

A group of four young adults (three men and one woman) are gathered around a smartphone, looking at the screen with expressions of joy and interest. The lighting is warm and slightly dim, suggesting an indoor setting at night. A diagonal white line runs across the image from the top left to the bottom right, separating the text area from the background image.

**Share your music!**

**People all around the  
world will applause  
and encourage you.**

Social Music Service based on BLOCKCHAIN TECHNOLOGY

**You will be popular  
with your music in  
demand, and the  
profit and  
recognition will  
naturally follow.**

**Because that is  
what the music celebrities earn.**

Social Music Service based on BLOCKCHAIN TECHNOLOGY

A woman with long dark hair, wearing a red top, is singing into a microphone. Another person is visible in the background, also holding a microphone. The scene is dimly lit with warm stage lights.

# Enjoy every genre of music on SOMESING

## Your life with SOMESING will unleash the limits and Lead you to the whole new world of freedom in music.

Social Music Service based on BLOCKCHAIN TECHNOLOGY

# SOMESING Social Music Service

Striving to create the perfect world for musicians, our SOMESING team has worked hard on the business design, development and operations together for the past five years.

**We cordially invite all of you, music lovers, to our new world of musical freedom.**

To some people, music is their hobby;  
It is their dream;  
It is their best gift of life;  
And it is their greatest footsteps towards the future.

SOMESING exists for all of the music lovers accessing our music platform freely and easily. We want to create one global community of music, the SingLovers' ecosystem. We have developed SOMESING, the Karaoke application, for all of those who love music. Previously, we had faced challenges and limitations in regards to globally reaching out to everyone who wanted to create or recreate their music with their own voices, although we developed the best-in-class music quality, sound effects and controls with great stability. Now, SOMESING has transformed itself and has overcome this challenge, having found the solution from its unique Blockchain-based technology by providing various music services for free to a massive number of people, who are willing to share their music contributing to SOMESING's ecosystem as SingLovers.

We look forward to providing services and to creating the world of music that everyone with passion in music creativity receives the fair share of profit for the contributions that they have made. We hope this provides satisfaction and happiness to every SingLover in the world.

CEO
